

Sixth Form 2025-27

Subject Options

Dear Students

We are delighted to introduce you to our friendly and vibrant co-educational sixth form, where we will inspire you to do your very best and prepare you for life beyond school.

Teaching at The Holt is excellent; you will benefit from our dedicated specialist teachers, their extensive subject knowledge, and their drive to inspire you to enjoy and achieve in your chosen areas of study. By selecting The Holt, you will be selecting a sixth form that has a proven academic record; the A level results of 2024 were excellent with 35.1% A*-A and 66% A*- B.

Throughout your time in the sixth form, we want to grow your self-confidence and independence, so you know you can do whatever you want with hard work, commitment, and guidance.

There are many reasons for choosing to study at The Holt School Sixth Form including

- A wide range of subjects without the restriction of option blocks
- Experienced sixth form teachers, many of whom are examiners.
- Small class sizes, so plenty of time to ask questions, hold discussions and work collaboratively.
- One to one coaching to improve study skills
- Supervised study sessions
- A dedicated personal tutor
- In –depth preparation for post-18 options
- Excellent facilities, including a private study room, kitchen, conference and study room
- Expert information, advice and guidance, which will allow you to progress to the best universities, apprenticeships or employment.

Being part of a sixth form in a school brings with it unique opportunities to belong and contribute to our school community through classroom attachment, House activities, charity events and being part of the student leadership team that runs Student Council. Subjects run trips and visits to enhance learning, and all these activities contribute to the strong sense of belonging our students have to The Holt.

To gain entry to The Holt School Sixth Form you must achieve a minimum of 5 GCSE grades 9-4 including maths and English as well as the criteria for the individual subjects that are detailed below.

Application forms can be found on the school website along with the prospectus. The deadline for applications is Monday 16th December 2024. Late applications will be accepted but we may not be able to offer places on courses that are already full.

We are delighted that you are considering the Sixth Form at The Holt and please do not hesitate to contact the sixth form team if you have any further questions.

Yours sincerely

Mrs A Kennedy and Mrs K Pearce

Co-Headteachers

A Level Subjects

| Subject | Head of Department | Email Address |
|---|----------------------|--|
| Art and Design: Fine Art | Mrs Skeates | c.skeates@holt.wokingham.sch.uk |
| Biology | Mrs Whitehouse | g.whitehouse@holt.wokingham.sch.uk |
| Business | Miss Illingworth | HIL@holt.wokingham.sch.uk |
| Chemistry | Mrs Nayyar | r.nayyar@holt.wokingham.sch.uk |
| Computer Science | Mrs Dearing | k.dearing@holt.wokingham.sch.uk |
| Design & Technology – Product Design/ Textiles | Mrs Williams | t.williams@holt.wokingham.sch.uk |
| Drama and Theatre | Miss Edwards | s.edwards@holt.wokingham.sch.uk |

| | |
|--------------------------|---------------------|
| Subject Name | Fine Art AQA |
| Entrance Criteria | Grade 6 in GCSE Art |

Year One Content

Component 1: Personal Investigation

Before starting component 1, students will explore a range of techniques in teacher led workshops to broaden their repertoire of skills and to build confidence. After this introductory period, students will work independently to produce the Personal Investigation. This sustained project must demonstrate an ability to research a theme in depth and explore it whilst using a range of media and approaches. The project will be drawn to a conclusion in the form of a final piece. You will be required to write a 1000-3000 word essay to support this project.

Year Two Content

Component 2: Externally set Assignment

AQA will provide candidates with 7 starting points to choose from. Having selected a theme, students are required to produce a thorough project that explores their chosen theme in a personal manner. The final outcome for the project will be produced during a 15 hour exam that takes place over 3 days.

How the course is assessed

Component 1: 60% Coursework
Component 2: 40% Coursework

Future Career Opportunities

There are a huge number of creative career opportunities; from advertising to fashion and textiles, photography to architecture, teaching to illustration, pattern design to jewellery design, gallery curation to art restoration, set design to prop making. An art and design degree or apprenticeship prepares students for the creative industry – one of the largest sectors of our economy.

Who do I need to speak to for more information?

Mrs Skeates, Head of Art

| | |
|--------------------------|--|
| Subject Name | Biology OCR |
| Entrance Criteria | Grade 6 in GCSE Mathematics AND 7-6 in Combined Science OR 6 in Separate (Triple) Biology, Physics & Chemistry |

| Year One Content |
|---|
| <p>Module 1: Development of practical skills in biology Skills of planning, implementing, analysis and evaluation</p> <p>Module 2: Foundations in biology Cell structure, biological molecules, enzymes, biological membranes, cell division, diversity and organisation</p> <p>Module 3: Exchange and transport Exchange surfaces, transport in animals, transport in plants</p> <p>Module 4: Biodiversity, evolution and disease Communicable diseases, disease prevention, immune system, biodiversity, classification and evolution</p> |

| Year Two Content |
|--|
| <p>Module 5: Communication, homeostasis and energy Communication, homeostasis, excretion, neural and hormonal communication, plant and animal responses, photosynthesis and respiration</p> <p>Module 6: Genetics, evolution and ecosystems Cellular control, inheritance, genomics, biotechnology, ecosystems, populations and sustainability</p> |

| How the course is assessed |
|--|
| <p>Modules 1, 2, 3 and 5 and 1, 2, 4 and 6 assessed by 2 written examination papers 2¼ hours in duration A further synoptic examination paper 1½ hours in duration A teacher assessed practical endorsement A 3 day field trip is held in the October of year 13.</p> |

| Future Career Opportunities |
|--|
| <p>Biology leads to many careers – directly (biological sciences, medicine, veterinary science, teaching) and indirectly (from sports science to law – specialising in a scientific area).</p> |

| Who do I need to speak to for more information? |
|--|
| <p>Mrs Whitehouse – Head of Biology</p> |

| | |
|--------------------------|---|
| Subject Name | Business AQA |
| Entrance Criteria | Grade 5 in GCSE Business, if taken, and Grade 5 in GCSE Maths |

Year One Content

1. What is business?
2. Managers, leadership and decision making
3. Decision making to improve marketing performance
4. Decision making to improve operational performance
5. Decision making to improve financial performance
6. Decision making to improve human resource performance

Year Two Content

1. Analysing the strategic position of a business
2. Choosing strategic direction
3. Strategic methods: how to pursue strategies
4. Managing strategic change

How the course is assessed

There are 3 units which assess the whole subject content and are equally weighted

Unit 1: This is a mix of multiple choice, short answer questions, calculations and essays

Unit 2: This has three data response compulsory questions worth approximately 33 marks each and made up of three or four part questions

Unit 3: This has one compulsory case study followed by approximately six questions

Future Career Opportunities

Business studies combined with other A levels is an ideal foundation for a variety of degree courses. This can then open the door to a wide range of professions including Accountancy, Marketing, Personnel, Operations, Retail Management, Journalism and Events Management.

Who do I need to speak to for more information?

Miss Illingworth – Head of Business

| | |
|--------------------------|---|
| Subject Name | Chemistry A OCR |
| Entrance Criteria | Grade 6 in GCSE Mathematics AND 7-6 in Combined Science OR 6 in Separate (Triple) GCSE Chemistry, Biology & Physics |

| Year One Content |
|---|
| <p>Module 1: Development of practical skills in chemistry* Skills of planning, implementing, analysis and evaluation</p> <p>Module 2: Foundations in Chemistry Atomic structure, quantitative chemistry: formulae, equations amount of substance and the mole</p> <p>Module 3: Periodic Table and Energy Periodic and group properties, enthalpy changes and their determination rates of reaction, reversible reactions and chemical equilibrium</p> <p>Module 4: Basic concepts and Hydrocarbons Nomenclature and formula representation, functional groups, organic reactions and Isomerism, aliphatic hydrocarbons, alcohols and haloalkanes, organic practical skills and organic synthesis and instrumental analytical techniques</p> |

| Year Two Content |
|---|
| <p>Module 1: Development of practical skills in chemistry* Skills of planning, implementing, analysis and evaluation</p> <p>Module 5: Physical chemistry and transition elements Rate equations, orders of reaction, the rate determining step, equilibrium constants, K_c and K_p, acid–base equilibria including pH, K_a and buffer solutions, lattice enthalpy and Born–Haber cycles, entropy and free energy and electrochemical cells</p> <p>Module 6: Organic chemistry and Analysis Aromatic compounds, carboxylic acids and esters, organic nitrogen compounds: amines and amino acids, polymerisation: addition polymers and condensation polymers, synthetic organic chemistry and further development of practical skills and the importance of modern analytical techniques in organic analysis</p> |

| How the course is assessed |
|---|
| <p>2 written examination papers 2¼ hours in duration A further synoptic examination paper 1½ hours in duration *A teacher assessed practical endorsement</p> |

| Future Career Opportunities |
|--|
| <p>Medicine, Veterinary Science, Dentistry, Engineering, Biochemistry, Pharmaceutical science, Forensics, Food science, Geology, Environmental science, Law, Accountancy, Education, Nano scientist, Nursing, Midwifery, Physiotherapy, Sports science, Material scientist, Journalist, Patent Attorney, Toxicology, Polymer scientist and many more due to the transferable skills that you gain!</p> |
| Who do I need to speak to for further information? |
| <p>Mrs Nayyar – Head of Chemistry</p> |

| | |
|--------------------------|---|
| Subject Name | Computer Science OCR |
| Entrance Criteria | Grade 5 in GCSE Mathematics and Grade 5 in GCSE Computer Science |

| Content |
|---|
| <p>Component 01 – Computer Systems: Students are introduced to the internal workings of the CPU, data exchange, software development, data types and legal and ethical issues. The resulting knowledge and understanding will underpin their work in component 03. It covers:</p> <p>The characteristics of contemporary processors, input, output and storage devices</p> <ul style="list-style-type: none"> • Types of software and the different methodologies used to develop software • Data exchange between different systems • Data types, data structures and algorithms • Legal, moral, cultural and ethical issues <p>Component 02 - Algorithms and programming This builds on component 01 to include computational thinking and problem-solving. It covers:</p> <ul style="list-style-type: none"> • What is meant by computational thinking (thinking abstractly, thinking ahead, thinking procedurally etc.) • Problem solving and programming – how computers and programs can be used to solve problems • Algorithms and how they can be used to describe and solve problems. <p>Programming Language We will continue to develop your knowledge of the python programming language from GCSE as well as introducing you to a few others. The language chosen for the Programming project (03) should be appropriate to the task chosen. There are several programming languages which the exam board will accept which are outlined in the specification.</p> |

| Non-exam Assessment - Programming Project |
|---|
| Students are expected to apply the principles of computational thinking to a practical coding programming project. They will analyse, design, develop, test, evaluate and document a program written in a suitable programming language. The project is designed to be independently chosen by the student and provides them with the flexibility to investigate projects within the diverse field of computer science. |
| How the course is assessed |
| Assessment comprises two exams with a range of short and long answer questions as well as a project, which is referred to as the programming project. The examinations make up 80% of the final grade and the programming project, 20%. An awareness of the application of computer science in the real world will be required as is the desire to solve problems and create program |
| Future Career Opportunities |
| A Computer Science A level helps to prepare you for many courses at university and can also be the qualification that you may need to secure a Level 3 apprenticeship. It is a highly academic subject that will help you to develop the problem solving and algorithmic skills needed in areas such as Mathematics, Science, Economics as well as, of course, Computer Science related areas. |
| Who do I need to speak to for further information? |
| Mrs Dearing – Head of Computing |

| | | |
|--|---|--|
| Subject Name | Design & Technology – Product Design Edexcel - A' Level (9DT0) | |
| Entrance Criteria | Grade 6 in GCSE Design & Technology | |
| Year One Content | | |
| <p>Principles of Design and Technology, will include:</p> <p>Topic 1: Materials Topic 2: Performance characteristics of materials Topic 3: Processes and techniques Topic 4: Digital technologies Topic 5: Factors influencing the development of products Topic 6: Effects of technological developments Topic 7: Potential hazards and risk assessment Topic 8: Features of manufacturing industries Topic 9: Designing for maintenance and the cleaner environment Topic 10: Current legislation Topic 11: Information handling, Modelling and forward planning Topic 12: Further processes and techniques.</p> | | |
| Year Two Content | | |
| <p>The non-exam assessment (NEA) is made up of a single substantial independent design and make project.</p> <p>There are four sections to this:</p> <p>Part 1: Identifying and outlining possibilities for design You will individually and/or in consultation with a client/end user identify a problem and design context.</p> <p>Part 2: Designing a prototype Then develop a range of potential solutions which include the use of computer aided design and evidence of modelling. You will make decisions about the designing and development of the prototype in conjunction with the opinions of the client/end user.</p> <p>Part 3: Making a final prototype You will realise one potential solution through practical making activities with evidence of project management and plan for production. You will incorporate issues related to sustainability and the impact their prototype may have on the environment.</p> <p>Part 4: Evaluating own design and prototype You are expected to analyse and evaluate design decisions and outcomes for prototypes/products made by themselves and others and to analyse and evaluate wider issues in design technology, including social, moral, ethical and environmental impacts.</p> <p>The NEA will be completed in the second term and then the principles of design will be revised in preparation for the summer examination.</p> | | |
| How the course is assessed | | |
| Written examination Paper (2 ½ hours) - 120 marks including the following topics covered in year 1. | Non-exam assessment criteria (NEA) – 50%:120 marks | |
| Future Career Opportunities | | |
| <p>The possibilities are endless! Any career that requires problem solving, critical analysis or creativity. For example Product Designer, Graphic designer, Industrial designer or Fashion designer, Architect, Textiles designer, Merchandiser, Clothing and Textiles technologist, Interior or Spatial designer, Print maker, Retail buyer, Architectural technician, Education- Teacher, Lecturer, Museum or Gallery conservator, Colour technologist to name a few.</p> | | |
| Who do I need to speak to for more information? | | |
| Mrs Williams – Head of Design Technology Faculty | | |

| | |
|--------------------------|--|
| Subject Name | Drama and Theatre AQA |
| Entrance Criteria | Grade 5 in Drama and English language & literature |

Year One Content

Component 2: Creating original drama (Practical) (Summer Term)

You will create a performance piece inspired by a theatre practitioner.

You will: • Create devised drama piece • You may contribute as performer, designer or director
• Devised piece must be influenced by the work and methodologies of one prescribed practitioner. This will result in a performance to a live audience in the summer term.

Component 1: Drama and theatre (Winter-Spring Term)

Study of two plays Antigone by Sophocles and Yerma by Federico García Lorca

You will: • Exploring your knowledge and understanding of drama and theatre • Study of two set plays • Analysis and evaluation of the work of live theatre makers

Year Two Content

Component 3: Making theatre (practical) (Spring Term)

In this component you will practically explore and interpret three extracts (Extract 1, 2 and 3) each taken from a different play

You will apply a prescribed practitioner to Extract 3

Extract 3 is to be performed as a final assessed piece

You may contribute as performer, designer or director

Component 1: The written exam (summer term)

• Open book

How the course is assessed

Component 1: Drama and theatre

• Written exam: 3 hours • Open book • 80 marks • 40% of A-level

Component 2: Creating original drama (practical)

• Working notebook (40 marks) • Devised performance (20 marks) • 60 marks in total • 30% of A-level

Component 3: Making theatre (practical)

- Performance of Extract 3 (40 marks)
- Reflective report (20 marks)
- 60 marks in total
- 30% of A-level

Future Career Opportunities

Future industry sectors:

Arts, Broadcasting, Charity, Culture, Education, Events, Health, Law, Marketing, Media, Politics, Sector Management, Sales, Social Work, Vlogging

Who do I speak to for further information?

Miss Edwards – Head of Drama

| | |
|--------------------------|-----------------------|
| Subject Name | Economics A Edexcel |
| Entrance Criteria | Grade 6 in GCSE Maths |

Year One Content

| |
|--|
| <p>Theme 1: Introduction to markets and market failure (microeconomics)</p> <ul style="list-style-type: none"> • Nature of economics • How markets work • Market failure • Government intervention <p>Theme 2: The UK economy - performance and policies (macroeconomics)</p> <ul style="list-style-type: none"> • Measures of economic performance • Aggregate demand and aggregate supply • National income and economic growth • Macroeconomics objectives and policy |
|--|

Year Two Content

| |
|--|
| <p>Theme 3: Business behaviour and the labour market (microeconomics)</p> <ul style="list-style-type: none"> • Business growth and objectives • Costs, revenue and profit • Market structures • Labour market <p>Theme 4: A global perspective (macroeconomics)</p> <ul style="list-style-type: none"> • International economics and emerging and developing economies • Poverty and inequality • The financial sector • The role of the state in the macroeconomy |
|--|

How the course is assessed

| |
|--|
| <p>There are 3 units for this A level: Unit 1 examines themes 1 and 3 (microeconomics), Unit 2 examines themes 2 and 4 (macroeconomics) and Unit 3 examines all 4 themes. Units 1 and 2 are each worth 35% and Unit 3 is worth 30% of the A level.</p> |
|--|

Future Career Opportunities

| |
|--|
| <p>Economics is an ideal foundation for a variety of degree courses such as Economics, Modern Languages, Geography, History, Law, Business, Accountancy, Maths or Management. These degrees open the door to a wide range of professions including Accountancy, Marketing, Politics, Journalism, Teaching and of course becoming an Economist.</p> |
|--|

Who do I need to speak to for more information?

| |
|---|
| <p>Mrs Kennedy – Co-Headteacher and economics teacher</p> |
|---|

| | |
|--------------------------|---|
| Subject Name | A-Level English Language - AQA |
| Entrance Criteria | Grade 6 in GCSE English language and literature |

Year One Content

Language, the Individual and Society

In your first year of study, you will explore:

Textual Variations and Representations

You will learn how to understand how to apply different methods of language analysis to a range of different non-fiction texts

Children's Language Development

You will learn how to analyse different data sets such as children's speech and writing using different methods of language analysis.

Language in Action

Language Investigation coursework

After learning about how to collect language data, you will conduct your own study investigating different attitudes and views towards language variations.

Year Two Content

Language Diversity and Change

In your second year of study, you will explore:

Language Change

how language diversifies and changes and understand how to apply different methods of language analysis.

Language Diversity

You will also study how attitudes towards language diversification changes.

Language in Action

Original Writing

You will also complete a piece of original writing looking at either persuasion, storytelling or information.

How the course is assessed

Language, the Individual and Society – An open book examination worth 40%

Language Diversity and Change – An open book examination worth 40%

Language in Action – A coursework portfolio comprising of an essay and a piece of original writing worth 20%

Future Career Opportunities

Higher education courses in law, history, journalism and publishing. As well as potential careers in advertising, marketing, digital media, public relations, politics and the scope of writing professions.

Who do I need to speak to for more information?

Mrs McClelland – Head of English

| | |
|--------------------------|---|
| Subject Name | English Literature B AQA |
| Entrance Criteria | Grade 6 in GCSE English language and literature |

Year One Content

Comedy Genre

In your first year of study, you will explore the literary genre, comedy, and understand how it has developed over time. For this, you will study a brilliant range of texts including *Twelfth Night* by Shakespeare, *The Importance of Being Earnest* by Oscar Wilde and a range of poetry from poets such as Carol Ann Duffy.

Year Two Content

Crime Genre

In your second year of study, you will explore the literary genre, crime writing, which encompasses an exciting range of texts including *Atonement* by Ian McEwan, *The Rime of the Ancient Mariner* by Coleridge and a collection of poetry such as *My Last Duchess* by Robert Browning.

Theory and Independence

You will also complete two pieces of independent coursework. After learning about critical theories such as Feminism and Marxism. You will use these ideas to deconstruct a collection of poetry and one prose text.

How the course is assessed

Comedy Genre - A closed-book examination worth 40%

Crime Genre - An open-book examination worth 40%

Non-exam Assessment - A coursework portfolio comprising of two essays worth 20%

Future Career Opportunities

Higher education courses in law, history, journalism and publishing. As well as potential careers in advertising, marketing, digital media, public relations, politics and the scope of writing professions.

Who do I speak to for further information?

Mrs McClelland – Head of English

| | |
|--------------------------|-----------------------|
| Subject Name | Further Maths EDEX |
| Entrance Criteria | Grade 8 in GCSE Maths |

Year One Content

The course comprises two compulsory pure mathematics modules and two optional modules. The current optional modules taught are Further Statistics 1 and Decision 1. The teaching of these modules are split across the two years.

It is possible to sit the AS examination in the summer of Year 12 if you would only like to take the AS Further Maths AS level.

Further Pure Mathematics. Topics covered: Proof; Complex numbers; Matrices; Further algebra and functions; Further calculus; Further vectors

Unit C: Further Statistics 1 - Statistical distributions, Hypothesis testing, Chi squared tests, Estimation, Confidence intervals, Quality of tests and estimators

Unit G: Decision Mathematics 1 - Algorithms and graph theory, Critical path analysis, Linear programming, Transportation problems, Allocation (assignment) problems,

Year Two Content

Further Pure Mathematics. Topics covered: Proof; Complex numbers; Matrices; Further algebra and functions; Further calculus; Further vectors

Unit C: Further Statistics 1 - Statistical distributions, Hypothesis testing, Chi squared tests, Estimation, Confidence intervals, Quality of tests and estimators

Unit G: Decision Mathematics 1 - Algorithms and graph theory, Critical path analysis, Linear programming, Transportation problems, Allocation (assignment) problems,

How the course is assessed

The course assessment is 100% examination, all taken at the end of the course

Further Pure Mathematics 1: 90 minutes (25%)

Further Pure Mathematics 2: 90 minutes (25%)

Paper 1 and Paper 2 may contain questions on any topics from the Pure Mathematics content.

Further Statistics 1: 90 minutes (25%)

Decision 1: 90 minutes (25%)

Future Career Opportunities

Studying further mathematics opens the door to careers that use mathematical models to predict responses to stimuli or to predict future growth. Careers such as Banking, Investment, Actuarial Science, Engineering, Meteorology, Biological and Physical Sciences and Pharmaceuticals. Students that wish to read mathematics at university should study further maths, but it is also useful for any subject with a large mathematical content such as Engineering, Physics or Computer Sciences.

Who do I need to speak to for more information?

Mr Green – KS5 Coordinator for Maths

| | |
|--------------------------|---------------------------|
| Subject Name | Geography AQA |
| Entrance Criteria | Grade 6 in GCSE Geography |

Year One Content

Physical Geography

Water and Carbon Cycle - This section focuses on the major stores of water and carbon at or near the Earth's surface and the dynamic cyclical relationships associated with them.

Coasts - This section focuses on coastal zones, which are dynamic environments in which landscapes develop by the interaction of winds, waves, currents and terrestrial and marine sediments.

Human Geography

Changing Places - This section focuses on people's engagement with places, their experience of them and the qualities they ascribe to them, all of which are of fundamental importance in their lives.

Global Governance - This section focuses on globalisation the economic, political and social changes associated with technological and other driving forces which have been a key feature of global economy and society in recent decades.

Year Two Content

Physical Geography

Hazards – This section focuses on the lithosphere and the atmosphere, which intermittently but regularly present natural hazards to human populations, often in dramatic and sometimes catastrophic fashion.

Human Geography

Population and Resources - This section explores the relationships between key aspects of physical geography and population numbers, population health and well-being, levels of economic development and the role and impact of the natural environment.

How the course is assessed

Component 1 Physical Geography Exam

- 40% of A Level 2 hour 30 minutes written examination
- Multiple choice, structured short and extended questions, plus an essay

Component 2 Human Geography Exam

- 40% of A Level 2 hour 30 minutes written examination
- Multiple choice, structured short and extended questions, plus an essay

Component 3 Geographical Investigation

- Individual investigation which must include data collected in the field. Can be human or physical.
- 3,000 - 4,000 words 20% of A level

Component 3 - the 'Geographical Investigation' requires that the students undertake 4 days of field work. This will be conducted on a compulsory residential fieldtrip to Swanage and surrounding area. The estimated cost of this trip will be approximately £400. The trip will take place in the summer term of Y12.

Future Career Opportunities

Law, Banking and Finance, Environment Agency, Marketing, Accountancy, Surveyor, Architect or any management position. Statistics show that compared to other subjects, Geography graduates are among the most employable.

Who do I need to speak to for more information?

Mr Marrison Head of Geography

| | |
|--------------------------|---|
| Subject Name | History (AQA) |
| Entrance Criteria | Grade 6 in GCSE History OR a grade 6 in GCSE English if GCSE History not taken |

Year One Content

Unit 1C: Consolidation of the Tudor Dynasty: England 1485-1547

- Monarchy restored and enhanced, 1485-1529
- Revolution in Church and State, 1529-47

Unit 2O: The Weimar Republic 1918-1933

- The Establishment and Early Years of Weimar Germany, 1918-24
- The Weimar Republics Golden Age 1924-28
- The collapse of democracy, 1928-33

Year Two Content

Unit 1C: England, 1547-1603: Turmoil and Triumph

- The Mid-Tudor crisis 1547-63
- The triumph of Elizabeth, 1563-1603

Part 2: Year 13

- The Nazi Dictatorship, 1933-39
- The impact of Nazism on the German people, 1933-45
- The Racial State, 1933-45

Historical Investigation (NEA)

A piece of coursework between 3500 to 4500 words, spanning a topic over a period of 100 years. It is an independently researched piece of work, which aims to develop many of the skills used in undergraduate study (evaluating sources, synthesising information, etc.) We offer a variety of questions on the topic of the Russian Revolution.

How the course is assessed

There are two examinations at the end of Year 13: one on the Tudor unit and one on Germany. Both are 2 hours and 30 minutes long. Each exam is worth 40% of the final grade. The historical investigation (coursework) comprises the final 20% of your grade

Future Career Opportunities

History is a well-regarded subject that can open many doors. It enables students to learn to construct an evidence-based argument and be critical of others. This is valued by many careers and employers, including but not limited to law, the civil service, heritage, business, media and teaching.....plus many more.

Who do I need to speak to for more information?

Miss Howard – Head of History and Government and Politics

Any of your history teachers!

| | |
|--------------------------|-----------------------|
| Subject Name | Mathematics EDEX |
| Entrance Criteria | Grade 7 in GCSE Maths |

| |
|-------------------------|
| Year One Content |
|-------------------------|

Pure Mathematics

Topics covered: Proof (deduction and counter example); algebra and functions (indices and surds, algebraic manipulation, simultaneous equations and inequalities); sketching and transforming graphs; equations of lines and circles; binomial expansion, factorials and combinations; trigonometry (sine and cosine rules, graphs of functions, basic identities and solving equations); exponentials and logarithms; mathematical models; calculus with polynomials; 2D vectors.

Statistics and Mechanics

Topics covered: statistical sampling; data presentation and interpretation (correlation, central tendencies and variance); probability (conditional probability and continuous distributions); statistical distributions (binomial and normal); hypothesis testing. Quantities and units; kinematics (SUVAT equations, graphs, calculus and vectors); forces and Newton’s laws (gravity, weight, friction, connected particles); moments.

| |
|-------------------------|
| Year Two Content |
|-------------------------|

Pure Mathematics

Topics covered: Proof (deduction and contradiction); algebra and functions (rational expressions, modulus function, partial fractions, composite functions); parametric equations; sequences and series (arithmetic and geometric); trigonometry (radian measure, inverse and reciprocal functions, further identities); differentiation (products and compositions of functions, trigonometric, exponential and logarithmic functions, implicitly or parametrically defined functions); integration (substitution, by parts, differential equations); numerical methods; 3D vectors.

Statistics and Mechanics

Further work on: statistical sampling; data presentation and interpretation (correlation, central tendencies and variance); probability (conditional probability and continuous distributions); statistical distributions (binomial and normal); hypothesis testing. Quantities and units; kinematics (SUVAT equations, graphs, calculus and vectors); forces and Newton’s laws (gravity, weight, friction, connected particles); moments. .

|-----------------------------------|
| How the course is assessed |
|-----------------------------------|

The course assessment is 100% examination, all taken at the end of the course.

Pure Mathematics 1: 2 hours (33 ⅓%)

Pure Mathematics 2: 2 hours (33 ⅓%)

Paper 1 and Paper 2 may contain questions on any topics from the Pure Mathematics content.

Statistics and Mechanics: 2 hours (33 ⅓%)

| |
|------------------------------------|
| Future Career Opportunities |
|------------------------------------|

Mathematics naturally lends itself to careers in Finance such as Investment or Accountancy, and careers relating to the physical world such as Engineering, Meteorology or Marine Biology. Employers look for employees with strong number, reasoning and problem solving skills, these skills are constantly developed by studying mathematics, making it a versatile subject. It prepares you for many careers that you might not initially link to maths, such as Teaching, Medicine or Law.

|---|

| | |
|--------------------------|---|
| Subject Name | Music AQA |
| Entrance Criteria | Grade 6 in GCSE Music Having regular lessons on an instrument/voice to approximately grade 4 standard or above |

Year One Content

The course is split into three main elements: performing, composing and listening/appraising. The first year of the course will start to explore the set works within the first area of study, choosing between, Romantic piano music and music from Mozart's operas. In addition to the first area of study, there is the choice to specialise in one of the following genres: pop music, music for media, Jazz. Within the course we will begin to develop compositional techniques, looking at composing in a range of styles linked to the areas of study. There will be ongoing performance opportunities throughout the course on their solo instrument or in an ensemble.

Year Two Content

The main structure of the course is the same as Year 1. Additional areas of study for Year 2 will include studying set works within the genre of the Baroque solo concerto. There will also be the choice to focus on a further topic of choice from: musical theatre, contemporary traditional music, Art music. In the second year of the course, we will begin to focus on the coursework element of composition; students will work on one composition from a choice of briefs set by the exam board, and one free composition from a brief chosen themselves. Performance opportunities will be ongoing, and we will be working towards preparing for the final performance recital of solo or ensemble pieces.

How the course is assessed

Performance (35%) is externally assessed with a recording of a solo or ensemble performance at least 10 minutes long. Composition (25%) is externally assessed in two parts; one composition to a brief, and one free composition of the candidates' choice, with both compositions combined lasting at least 4.5 minutes. The listening exam (40%) assesses general musical understanding, as well as essay questions based on analysis of the set works within the Areas of Study.

Future Career Opportunities

Music A level is obviously a great choice for anyone interested in studying music or music technology to a university or conservatoire level. It is also a highly regarded subject by all of the UK's top universities, due to the diverse range of practical, analytical and academic skills required. A good grade in Music A level can complement other subjects for university applications in other specialisms, so should be considered by anyone with a real interest in music regardless of whether it is their chosen career pathway or not.

Who do I need to speak to if I need more information?

Mr Gray – Head of Music
